Why would Am/Fm stations need lobbyists to help them keep traffic and weather? Do they not have enough sense to keep playing it anyway? Keep in mind XM has traffic and weather for major markets and it is a pay service... those of us who have XM pay for the service and as subscribers we should get that information too.

I am a proud subscriber to the XM service and think that the 1st amendment would protect the rights of XM and its listeners to have traffic and weather...
